MOLLE AD ARIA ERREVI ERREVI AIR SPRINGS

Le molle ad aria ERREVI rispondono all'esigenza di una guida confortevole, di carico ottimale del veicolo grazie alla qualità dei materiali e delle lavorazioni.

ERREVI air springs answer the needs of high comfort driving and optimum uploading with its high quality materials and superior workmanship.

Le membrane ERREVI senza la parte in metallo sono generalmente preferite per i bus, grazie al confort di marcia che garantiscono ed alla possibilità di mantenere il mezzo all'altezza voluta.

The standard rolls without the metal part are generally preferred by busses and has the ability to supreme spring. ERREVI air springs provide a high comfort driving experience to the passengers while it keeps the vehicle height at the wanted height.

Le molle complete di pistone sono usate per le motrici ed i rimorchi. Questo tipo di molle sono fissate al telaio del veicolo per mezzo della piastra. Ci sono fori per l'entrata e l'uscita dell'aria e parti per l'aggancio della piastra al telaio quali viti filettate e bulloni. Questo tipo di molle hanno due forme: una di tipo cilindrico e l'altra a forma di cono.

The service & complete air springs are used for truck and trailers. This type of ERREVI air springs is been connected to the chassis with the plate. There are fittings to enter and escape the air, and connections parts such as studs, and guide pins and etc for the link to the chassis. There are two different shapes of those type air springs. One has cylinder shape and the other has a cone shape.

Ci sono anche le molle ad aria a lobi che possono avere due o tre componenti a soffietto. Questo tipo di molle occupano meno spazio, sono facili da montare ed utilizzare ed hanno bassi costi di manutenzione. Evitano le vibrazioni e agiscono attivamente sulla sospensione.

There are also storied air springs that have two or three stories. Those springs are saving place, easy to use and have low maintenance cost. They prevent vibration and perform high at the suspension.
